# **GoodSecurity Penetration Test Report**

# Robert L. Myers@GoodSecurity.com

October 24, 2021

#### 1.0 High-Level Summary

GoodSecurity was tasked with performing an internal penetration test on GoodCorp's CEO, Hans Gruber. An internal penetration test is a dedicated attack against internally connected systems. The focus of this test is to perform attacks, similar to those of a hacker and attempt to infiltrate Hans' computer and determine if it is at risk. GoodSecurity's overall objective was to exploit any vulnerable software and find the secret recipe file on Hans' computer, while reporting the findings back to GoodCorp.

When performing the internal penetration test, there were several alarming vulnerabilities that were identified on Hans' desktop. When performing the attacks, GoodSecurity was able to gain access to his machine and find the secret recipe file by exploiting two programs that had major vulnerabilities. The details of the attack can be found in the 'Findings' category.

#### 2.0 Findings

# **Machine IP:** 192.168.0.20

```
:\Users\IEUser>ipconfig /all
Windows IP Configuration
   Host Name .
                           . . . . . . : MSEDGEWIN10
   Primary Dns Suffix . . . . . : : : Node Type . . . . . . . : Mixed IP Routing Enabled . . . . . : No
   Primary Dns Suffix . .
   WINS Proxy Enabled. . . . . . : No
Ethernet adapter Ethernet:
   Connection-specific DNS Suffix .:
   Description . . . . . . . . : Microsoft Hyper-V Network Adapter Physical Address. . . . . . . : 00-15-5D-00-04-01
   DHCP Enabled. . .
                                   . . . . : No
   Autoconfiguration Enabled . . . . : Yes
   Link-local IPv6 Address . . . : fe80::19ba:64e7:838c:b1b6%14(Preferred)
IPv4 Address . . . . : 192.168.0.20(Preferred)

   NetBIOS over Tcpip. . . . . . : Enabled
```

#### Hostname: MSEDGEWIN10

- Simply search for Icecast and these 9 vulnerabilities will be displayed
- Upon further Investigation we also determined that there is a total of 9 publicly known vulnerability's on the Icecast streaming media server.
- The 9 vulnerabilities listed in the picture below can also be found at the following public website: https://www.exploit-db.com/
- This website is a popular public source of information documenting potential vulnerabilities. Simply search for Icecast and these 9 vulnerabilities will be displayed for any potential attacker to see. The vulnerability has been assigned the identifier <a href="CVE-2018-18820">CVE-2018-18820</a>.

#### **Vulnerability Exploited:** Icecast Header Overwrite

Search for Icecast using msfconsole to display the Icecast Header Overwrite exploit

#### **Vulnerability Explanation:**

The Icecast Header Overwrite exploits a buffer overflow in the header parsing of icecast versions 2.0.1 and earlier. This exploit will send 32 HTTP headers and cause a write one past the end of a pointer array. Basically, this can cause the system to crash or allow the attacker to establish remote access to the server or user.

In this specific example GoodSecurity was able to establish a remote code access connection allowing the Penetration Team to see all files and directories inside the Icecast server, specifically GoodCorp's CEO, Hans Gruber and the two files: user.secretfile.txt and Drinks.recipe.txt

#### Severity:

GoodSecurity's expert opinion this vulnerability would be **EXTREME** 

### Information Security Risk Rating Scale Extreme risk of security controls being compromised with Extreme the possibility of catastrophic financial losses occurring as aresult 13-15 High risk of security controls being compromised with the High potential for significant financial losses occurring as a 10-12 result Elevated risk of security controls being compromised with the potential for material financial losses occurring as a result Elevated Moderate risk of security controls being compromised with the possibility of limited financial losses occurring as a Moderate result Low Low risk of security controls being compromised with measurable negative impacts as a result 1-3

## **Proof of Concept:**

# 3.0 Recommendations

What recommendations would you give to GoodCorp?
